St John's School
LEATHERHEAD

/ CASE STUDY

St John's School / Leatherhead

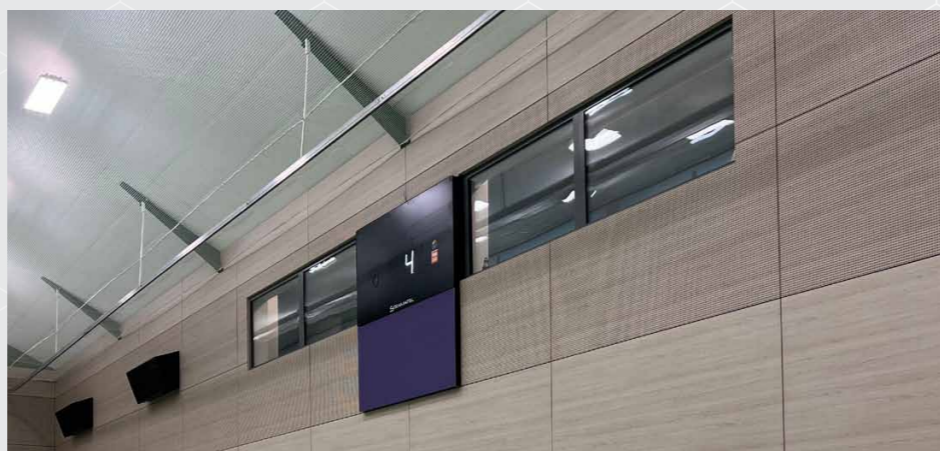

We've recently completed a major refurbishment of St John's School's sports hall adding to their extensive facilities on site. Scope included: new openings to form a gallery viewing area from the adjoining Swimming Pool complex, building works to close and increase existing openings, specialist sports acoustic wall cladding system and flooring, new lighting, heating and security cages, overhaul and installation of sports equipment including a scoreboard and new access control/security. All works were delivered over the summer holiday period ensuring all trades were programmed efficiently to hit time critical deadlines.

before

after

"The outline architectural designs for this project were developed collaboratively with a team of specialist contractors. Prestige took on the role of Principle Contractor, working tirelessly with the school estates team to deliver exceptional value for money within a tight programme and without disruption to the school.

I am very grateful to the whole team and genuinely look forward to working with Prestige again in the future."

William Nash, Estates Director, St John's School

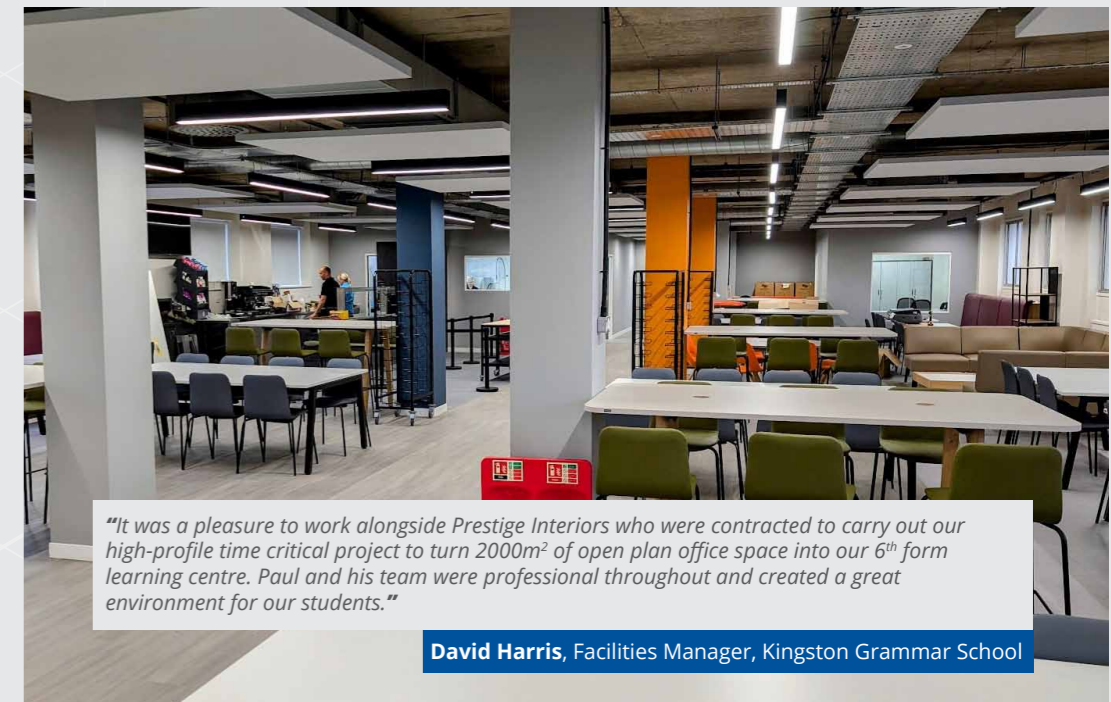

KINGSTON
GRAMMAR SCHOOL
FOUNDED 1541

CASE STUDY /

Kingston Grammar School, Kingston Upon Thames, London

We've recently completed a new 20,000 sq. ft 6th form centre for Kingston Grammar School. A tired 4 storey office building has been transformed into a fantastic new facility for the school, complete with classrooms, study, office and catering spaces. The team fast tracked the project to get it open in just 11 weeks after start of construction. The scope included new HVAC, electrical, fire and security systems.

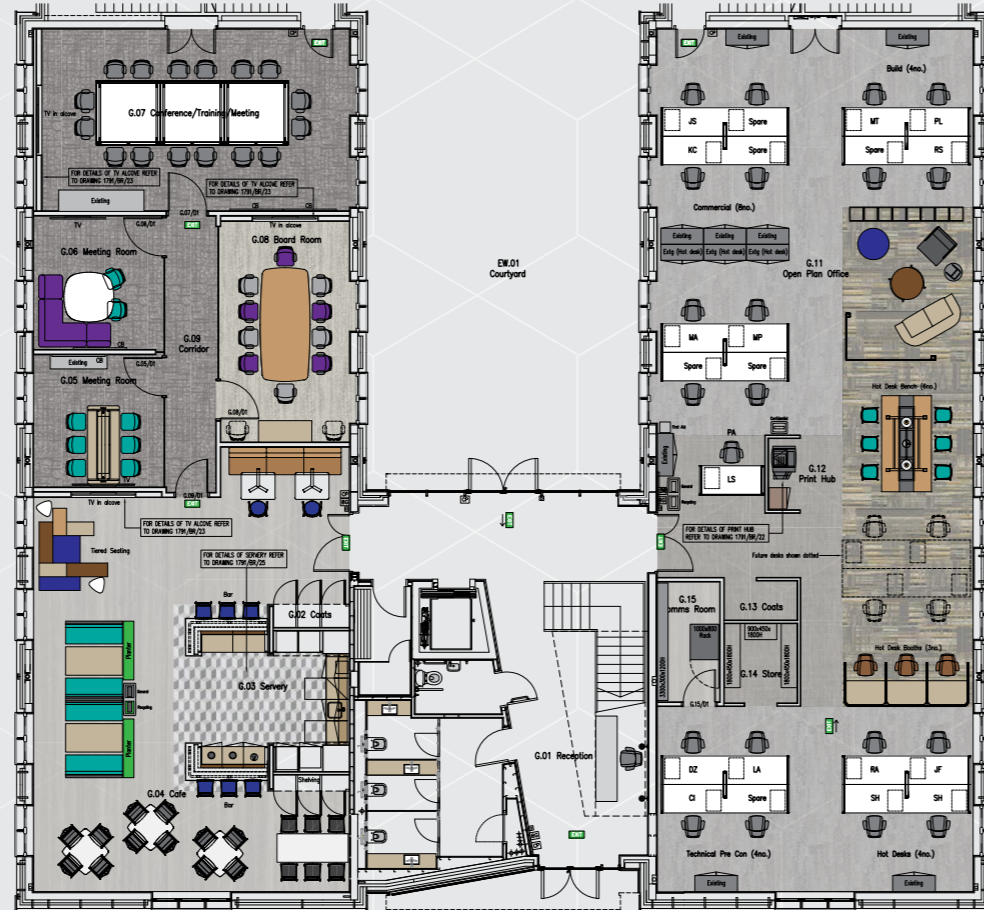

"It was a pleasure to work alongside Prestige Interiors who were contracted to carry out our high-profile time critical project to turn 2000m² of open plan office space into our 6th form learning centre. Paul and his team were professional throughout and created a great environment for our students."

David Harris, Facilities Manager, Kingston Grammar School

/ Commercial

Away from the education sector, we work on a wide variety of commercial projects across the industry including “blue chip”, health care, and retail - to name but a few. We offer a full range of design and build services including:

- Feasibility studies of both existing and new sites
- Statutory consents inc Planning & Building Regulations
- Working drawing packages and specifications
- Integration of specialist consultants and contractors.
- Furniture and finishes selection, supply and install.
- Project & contract management, administration of sub-contractors
- Interior fit out works
- External works
- Mechanical, electrical and public health works
- AV and IT / Data works
- General maintenance

/ Competencies

We have a wide variety of industry-recognised certifications, each symbolising our unwavering commitment to delivering first class services.

We ensure we run safe sites, planned carefully to operate and protect the environments and facilities they are within. We have an experienced in-house team ready to setup and plan our projects. Where required, we will leverage our diverse range of sub-contractors and consultants to ensure the full scope of our projects are understood, planned and costed.

If you would like to find out more about any specific competencies or accreditations please get in touch.

MASTER PLANS /

If you are at the early stages of redevelopment plans and need services including master plan development, assessments and other architectural services we would be delighted to introduce to you our architectural partners with extensive experience to draw on.

/ to find out more
