**CUSTOMER:** University of Westminster  
**CONTACT:** Gus Garcia  
**PROJECT DATES:** Approximately 1995 and ongoing  
**PROJECT VALUE:** up to £150,000

**UNIVERSITY OF  
WESTMINSTER**

## PROJECT DETAILS:

The **University of Westminster** is a public university in London. The headquarters and original campus are in Regent Street in the City of Westminster, London and with additional campuses in Marylebone, Harrow and Fitzrovia.

Prestige have been working with the University for approximately 22 years. Over the years our works have included surveying all the buildings, submission of schematic drawings for all the buildings, carried out periodic inspection reports on all the buildings and carried out day to day maintenance. The projects we have been involved in are of varying sizes from small to large ranging from £100 up to £150k.

Works have included but not limited to are, testing of electrical systems within laboratories, classrooms, lecture theatres, communications cabinets and office areas spanning throughout the University.

Also involved were complex sensitive areas and continuous three yearly experiments, all of which required careful planning. To avoid risk of disturbance, we provided temporary supplies and UPS to enable the shutdown of electrical supply whilst modifying the circuitry.

## CLIENT STATEMENT

Prestige have completed various projects throughout the year, they are very helpful in assisting with design and planning and all of their work is completed to very high standard.
